

Bi-fold doors

Our timber bi-fold doors make a unique design statement.

The doors stack compactly to the side to allow complete opening of the aperture. The result is a liberating feeling of open plan living, which really breaks down the barriers between home and garden.

Versatile and stylish, the system is available in our full colour range. You can even add a flush floor track so that you can enjoy a completely unobstructed walkway.

Bi-fold doors also form an attractive and practical division between the house and the conservatory as a means to maximise the extra space that a conservatory provides and to close off the conservatory on cold winter evenings.
